

# CRISALIS

THE FRENCH CLINICAL RESEARCH NETWORK  
FOR SEVERE ASTHMA

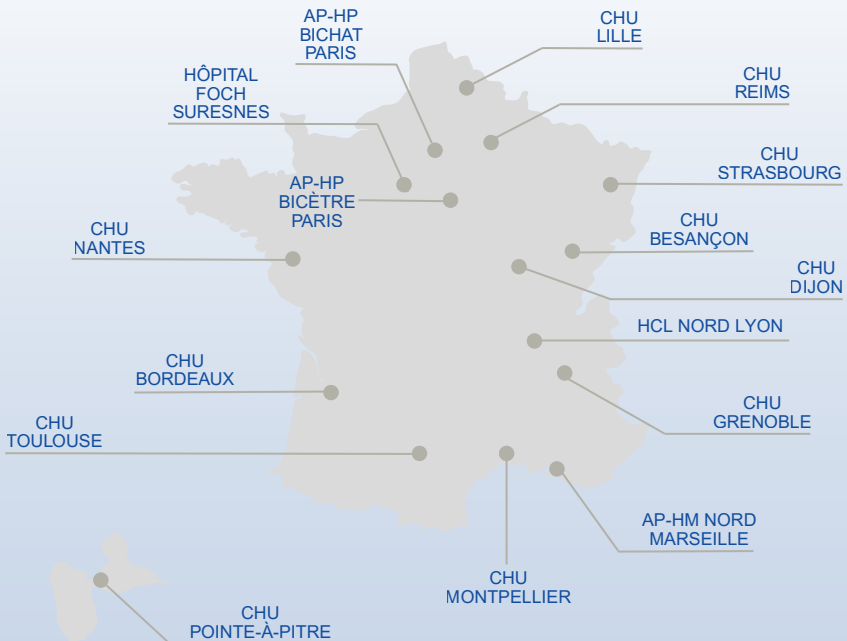

# About us

**CRISALIS is a French clinical research network that brings together leading specialized centers and experts in severe asthma. It is dedicated to advancing national and international research initiatives while strengthening collaboration and coordination among all stakeholders involved in patient care across the country.**

Its mission is to drive the development of innovative research projects — both academic and industry-sponsored — with the goal of improving diagnosis and therapeutic strategies, while elevating the global visibility and impact of French research in the field of severe asthma.

## Our network

# Our missions

- **Develop and conduct large-scale clinical trials** to evaluate innovative treatments for asthma management and care
- **Strengthen collaboration** between the various partners of the network
- **Harmonize** professional practices
- **Contribute** to the education and training of research stakeholders
- **Serve as a key point of contact** for all stakeholders involved in severe asthma research and provide operational support
- **Build strong relationships with patient associations** to keep them informed about protocol developments and stay closely aligned with their needs and concerns

# Our expertises

CRISALIS offers a full range of expertise for the design, implementation, and monitoring of both academic and industry-sponsored studies, covering every stage of research: concept, development, setup, execution, and scientific dissemination

## Support with the implementation of the project

Providing expertise and services for all stages of the trial: assessment of investigation costs, support with trial set-up, provision of a patient cohort, supervision of trial sites, optimisation of recruitment and follow-up processes, scientific analysis of results, communication...

## Feasibility of trials

Supporting the sponsor in identifying trial centres and assessing recruitment capacity

## Expertise and advice

Delivering expertise and services for trial design (target indications, scientific and methodological guidance, project development support, etc.)
